Lorena,

Sorry, I didn't specify exactly what I wanted to know, so here is clarification:

1. Specifically, I am looking for current email address for all current board members.
2. I would also like to know if you filed a report with the police for the dumping in the alley by Eric's Eisenberg's employees that I provided you with documentation of, and if the police took any action against these individuals.

Lorena,

I am looking for email addresses for the members of RED.

We may know one or two individuals that run your efforts to the Red Report Nights event in trying to prevent it from returning to San Pedro.

We current project is trying to locate Eric Eisenberg into providing sufficient dumpster capacity in the alley next to the Cabrillo hotel.

In spite of the documentation I have provided him, he didn't seem to think there is a problem. Except for people that have large items and drop them next to his dumpster.

I recently have been trying to document the large item drops and so far, the only people I have found that doing this are employees of the Renaissance group. I have observed two instances and have been able to document one, and in both cases when I talked to the perpetrators they said the worker for Renaissance. Since they both had key access to the basement of the Cabrillo Hotel, I find that explanation very believable. It appears that Eric is using San Pedro Clean to

The first shot below is one of Eric's employees dropping off a couch (he then drove up the alley and dropped the mattress in another dumpster). I personally observed at least one of the rolls of carpet in the foreground of the same shot came out of the back of a pickup truck driven by another of Eric's employees. The other shots are indication of how this alley has looked over the last year due to a lack of dumpster capacity and furniture and mattress "legally" are

Mr. Eckel,

I wish it were that simple.

We have seen an increase in illegal dumping in the alley, the problem we have is that when we lock the dumpster people break the locks at night, **not to mention the furniture that magically appears**. But, I don't need to tell you, your stuck looking at it as we are. Our plan is to install cameras and signage to try and catch the dumpers, until then, we do have employees checking and cleaning the alley. The bar does pay a recyclers to take away their bottles, under normal circumstances the can is more than adequate, as it is emptied three times a week. We want to get a handle on this as much as you do, it's not good for anyone.

Thank You,

Eric
